

India has made progress in increasing the attainment rate of primary education. In 2011, Approximately 75% of the population, aged between 7 to 10 years, was literate. India's improved education system is often cited as one of the main contributors to its economic development. Much of the progress, especially in higher education and scientific research, has been credited to various public institutions. While enrollment in higher education has increased steadily over the past decade, reaching a Gross Enrollment Ratio of 24% in 2013, there still remains a significant distance to catch up with tertiary education enrollment levels of developed nations, a challenge that will be necessary to overcome in order to continue to reap a demographic dividend from India's comparatively young population.

1.Which country has made progress in improving the attainment rate of primary education?

India

General knowledge: India is a country →

1.1 Which country has made progress in improving the attainment rate of secondary school?

No answer

1.2 Has Indian made progress in improving the attainment rate before secondary school?

Yes

General knowledge: primary education is before secondary school →

2.What is the trend of enrollment in private schools in India?

No answer

General knowledge: Private schools are different from primary education.

Increased steadily

General knowledge: last Synonym past ; ten years Synonym decade

7. What is India' s enrollment ratio for universities or similar institutes in 2013?

24%

General knowledge: higher education is mainly universities or similar institutes

7.1 What is India' s ratio of people not enrolled in higher education?

76%

General knowledge: The rest of 24% is 76%.

Secondary education in India is examination-oriented and not course-based: students register for and take classes primarily to prepare for one of the centrally-administered examinations. Senior school or high school is split into 2 parts (grades 9-10 and grades 11-12) with a standardized nationwide examination at the end of grade 10 and grade 12 (usually informally referred to as "board exams"). Grade 10 examination results can be used for admission into grades 11-12 at a secondary school, pre-university program, or a vocational or technical school. Passing a grade 12 board examination leads to the granting of a secondary school completion diploma, which may be used for admission into vocational schools or universities in the country or the world. Most reputable universities in India require students to pass college-administered admissions tests in addition to passing a final secondary school examination for entry into a college or university. School grades are usually not sufficient for college admissions in India.

1.How many parts is India' s senior middle school divided?

2

General knowledge: senior middle school equal_to senior school equal_to high school

2. What grades do you need to attend grades 11 – 12 at a junior school?

Grade 10 examination results

General knowledge: secondary school equal_to junior school

3. What can I get through the 12th grade exam?

A secondary school completion diploma

Note: This is a simple question.

4. Which is the most reputable universities in India?

No answer

Note: This is a normal question.

5. What is sufficient for college admissions in India?

No answer

General knowledge: 'sufficient' is exactly the opposite meaning with 'not sufficient' .

5.1 Are school grades sufficient for college admission in India?

No

General knowledge: 'sufficient' is exactly the opposite meaning with 'not sufficient' .

5.2 What are examinations required by popular universities?

college-administered admissions tests and final secondary school examination

General knowledge: requiring A in addition to B means that both A and B are required

Popular is similar to reputable in referring to universities

5.3 Reputable universities consider grade 10 examination results.

No Answer

The text did not say grade 10 examination results are not considered.
